

VEGA DAILY

Vitamins to VEGA !

23th. May, 2023

01

Vitamin | D-Calcium Pantothenate

This month, the overall calcium pantothenate market is flat, and factories are willing to raise prices. The transactions are weak, especially in foreign markets where prices are low. The current export price is USD15.5-16.5/KG, and individual brand's price is relatively low. Pay attention to the market situation in the future.

02

Amino Acids | Valine

The domestic market price is stable. And the export quotation is USD 3.3-3.4/KG. The market price of low-content valine is around USD 1.5/KG. Recently, with the entry of new manufacturers and the expansion of production by existing manufacturers, the market has entered a saturated state, and the overall valine market is stable and weak, so pay attention to the situation of factory orders in the later stage.

03

API | Florfenicol

The recent price is weak, the market demand is flat, and the competition is fierce. The current factory price is USD 37- 38/KG. The cost pressure of the factory is high. And follow-up attention will be paid to market demand, raw materials, and factory production.

04

Food Additive | Maltodextrin

Recently, affected by market demand, the transaction price of maltodextrin in the domestic market has been adjusted, the transaction price is around USD 645-675/KG, and subsequent prices tend to stabilize.
