## Vitamins to VEGA!

Vega, China Vitamins Manufacturer

### News

#### 1 Vitamin

Recently, NHU stated on the interactive platform that new products in 2023 include taurine, menthol, calcium pantothenate, etc. At present, the company's taurine production capacity is 30,000 tons, calcium pantothenate production capacity is 2,500 tons, vitamin C production capacity is 45,000 tons, and methionine production capacity is 300,000 tons (of which 150,000 tons are under phased testing).

Vitamin E market information has been updated. Since before the vitamin forum, manufacturers have begun to stop quoting and accepting orders for vitamin E. The market has mainly consumed early inventory. As of now, the market transaction price is around USD6.85-7.1/KG, which has stopped falling and rebounded slightly. , the local price in Europe is around EUR6.3-6.7/KG, USD6.9-7.4/KG, the North American market is around USD6.8-7/KG, the local market in South America is around USD7.3-7.5/KG, overall Speaking of which, VE global market prices have begun to stop falling and rebound.

#### 2 Amino Acids| Lysine

Recently, manufacturers' quotations have been stable, but terminal demand has been not strong and users are mostly bearish on the later trend. Recent rainy and snowy weather in the Northeast has affected factory shipment progress and slow logistics. It is expected that the lysine market will be not very strong in the short term.

#### 3 API

Sulfonamides: The market is running weakly, and prices remain low and stable. For sulfadiazine (sodium), the market price is within USD22/KG. For sulfamethazine (sodium), the market price is within USD11/KG. For later price trends, attention should be paid to market demand and order signing.

#### 4 Food Additives | Dimethyl sulfone

Recently, due to market demand, the market transaction price of the food additive dimethyl sulfone has stabilized at around USD5.5/KG. The delivery date is scheduled as normal, and subsequent prices will continue to remain stable.
