VITAMIN

01

Recently, NHU announced its environmental impact assessment for its annual 5,000-ton vitamin K3 project. This project is planned to be implemented in three phases, of which the vitamin K3 output in the first phase is 1,000t/a, and the vitamin K3 output in the second and third phases is 2,000t/a respectively. The project construction location is No. 32, Weiwu Road, Shangyu Economic and Technological Development Zone, Hangzhou Bay (within the existing factory area), with a total planned investment of 200 million yuan.

AMINO ACID

02

Lysine HCL: Recently, the market have been a bit weak. The export price is between USD1185-1205/MT. End users purchase on demand. The overall market transactions are average. And it is expected that the market will maintain weak in the future.

API

03

On January 22, Brother Technology announced that the company's wholly-owned subsidiary Jiangxi Brother Pharmaceutical Co., Ltd. recently received the European Pharmacopoeia Suitability Certificate for APIs issued by the European Medicines Quality Administration. The company stated that Brother Pharmaceuticals' obtaining the CEP certificate for iohexol API this time means that the company's API can be sold in international markets that recognize CEP certificates, which will have a positive impact on the company's further expansion of the international market for its iohexol API.

FOOD ADDITIVE

04

At present, some mainstream manufacturers of the nutritional additive creatine monohydrate have stopped trading, and the current market transaction price is around USD7.2-7.85/KG. It is expected to be shipped by the end of February. The manufacturer currently has a long delivery time and the price is expected to remain stable in the future.
