VITAMIN

01

Xiamen Kingdomway Group has recently been granted two patents by the China National Intellectual Property Administration, covering a semi-continuous solid-state fermentation process for nattokinase and a method for synthesizing astaxanthin monoesters using immobilized enzymes.

Meanwhile, false rumors have surfaced in the Chinese Vitamin D3 market, claiming "mainstream manufacturers are inactive" and "hundreds of tons of cholesterol are being imported." These claims are unfounded, as global cholesterol production capacity is far below such figures. Industry players are urged to stay rational and base decisions on verified information.

AMINO ACID

02

Valine: Some factories released maintenance plans before the holiday, and factory quotations have recently risen slightly. End users are purchasing based on actual needs, with the market price around USD 1.65/kg. The overall market remains cautious, but inquiries have increased. Further attention should be paid to factory delivery schedules.

API

03

Tylosin tartrate and tilmicosin phosphate: This month, mainstream manufacturers' prices have continued to rise, with tight deliveries. Market inquiries and purchases are active, and inventory levels are gradually decreasing. End users are beginning to adapt to the current price levels.

With CPHI approaching in June, factories are expected to further push prices higher. Currently, the market transaction price for tylosin tartrate is around USD 38.02, and for tilmicosin phosphate, around USD 42.38.

FOOD ADDITIVE

04

Recently, due to market demand, the international transaction price for sodium saccharin dihydrate is around USD 4.3–4.6/kg. The price of anhydrous sodium saccharin is expected to remain stable in the short term.
